Crowlands Wind Farm Project – Update

Construction progress

We are pleased to advise that all wind turbine generators have been erected on the Crowlands Wind Farm site! While there is still much work to be done before completion, you may notice less activity on site and fewer vehicle movements.

A misty morning over Crowlands

Movement of large vehicles

Please be aware that over-sized trucks will continue to be moving in and out of the area as the transition from construction to operations continues over the coming months.

Visual Screening Program

Pacific Hydro is offering a visual screening program for residential properties located close to the Crowlands Wind Farm Project that have views of project infrastructure.

Visual screening helps to reduce potential visual impacts with the use of landscaping, tree planting, and other treatments on our project neighbours' land.

These works are arranged with costs covered by Pacific Hydro; including maintenance and watering for a period of two years after planting.

Owners of residential properties within 3km of the project are invited to participate in this program. To register your interest, please complete [this form](#) and return it to us or contact us on enquiries@pacifichydro.com.au

Solar Power at Crowlands Hall

The local hall near Crowlands Wind Farm is now powered by solar thanks to a contribution made by Pacific Hydro at the ground-breaking ceremony for the project. The 6kW smart hybrid rooftop solar system with 7kW battery storage was recently installed by Wade's, a local Clean Energy Council accredited installer.

We are always keen to hear your ideas about how Pacific Hydro can share the benefits of its assets. Providing support for Crowlands Hall was just the start of our long-term relationship with the Crowlands community and beyond by using a local supplier.

Crowlands Sustainable Communities Fund

Watch this space! Pacific Hydro is pleased to announce that over the life of the Crowlands Wind Farm more than \$2m will be directly invested in community projects through our [Community Investment Program](#). We will be launching the Crowlands Sustainable Communities Fund in September this year.

Have your say on which communities should be our priority funding areas by emailing enquiries@pacifichydro.com.au or calling 1800 730 734.
