

13 February 2017

Dear Resident

Yaloak South Wind Farm - Commencement of Construction

Site Huts

As part of the Yaloak South Wind Farm Project, site huts are scheduled to be delivered in the week commencing 20 February 2017. The establishment of these facilities will enable major construction activity to begin, which is expected to be underway in early March.

Managing Construction Impacts

Pacific Hydro and our Yaloak South Wind Farm project partners WRJV are committed to identifying potential construction impacts and managing them responsibly. Where possible, we aim to reduce any impact of our works on the community and the environment and thank you for your patience as we build this important project.

Glenmore Road

Glenmore Road is a public road, and will experience higher-than-usual volumes of traffic over the next 12-14 months. The project team will continue to work closely with Moorabool Shire Council to ensure that the road is inspected regularly, and that our obligations are met.

TV Survey

TV surveys will be conducted shortly for project neighbours who expressed their interest in participating.

Project Updates

We encourage you to visit Pacific Hydro's Community Notice Board under the Our Communities tab of our website (www.pacifichydro.com.au) for up to date information about the project. Should you require further information, please don't hesitate to contact us.

Yours sincerely

Krista Kim
Engagement and External Affairs Manager
Pacific Hydro Australia
