

# Road Upgrades

## Overview

As part of the Yaloak South Wind Farm Project, sections of Glenmore Road will be upgraded between the Geelong-Ballan Road intersection and the site entrance approximately 2km to the east.

To minimise disruption, the works will be undertaken with full traffic control in place. These works will not require any road closures; and any delays will be kept to a minimum.

The works will occur in October 2016.

## Scope of Works

The works will ensure that traffic can continue to use the road safely, both during and after construction; and includes:

- Widening and re-alignment of Glenmore Road at the intersection with Geelong-Ballan Road
- Widening along Glenmore Road at crests and access gates, improving safety
- Protection of a historical marker at the intersection of Glenmore Road and the site entrance
