

Engagement with Communities

E. I. ENGINEERING INTELLIGENCE.
That's what we do.

Overview – About RCR

RCR works with some of the world's leading companies to provide intelligent engineering solutions across the Infrastructure, Energy and Resources sectors.

RCR has proven experience in the construction of large scale solar farms with significant projects in Victoria, New South Wales, Western Australia and Queensland. RCR is the EPC contractor engaged by Pacific Hydro to build the Haughton Solar Farm.

Community Focused

Supporting Communities

At RCR we are committed to:

- Ensuring our community relations policy is communicated to all our employees and other stakeholders
- Understanding that each and every community is unique and requires the appropriate relationship development
- Ensuring we **engage with the community** on expectations and seek regular feedback to ensure we develop our future relationships
- Providing **support to local communities** with employment and career development
- The support of culture that **respects indigenous well-being** and cultural heritage

Community activities

Our belief is that industry engagement and relationships with local communities are essential to delivering a successful project

The construction program brings with it opportunities for businesses and employment. These opportunities were presented recently at the Burdekin Breakfast held by Burdekin Shire Council. Nick Farrington, Project Manager (Acting) for the project presented to attending Councillors, local industries, and guests about RCR as well the range of local vendor opportunities. Information about the local vendor opportunities can be found on the RCR website. Visit rcrtom.com.au.

Our community engagement program

During the construction process, we will provide regular updates to neighbours and the broader community about the project. Neighbours will be informed when there may be things occurring on site that may impact them, such as periods of higher delivery or truck movements, or more noisy work. RCR is committed to keeping you informed regarding the project, and responding to any questions you may have.

Questions during construction

There are a range of activities which will be conducted on and around the site during the construction period (also see Project Overview March 2018). RCR is committed to respecting our neighbours and the communities within which we work. We impose measures to manage the impacts of construction throughout the project.

As well as the construction team there is a Health, Safety and Emergency (HSE) officer and Construction Manager on site. Any queries regarding construction can be directed to Anita Payne on 0459 861 759 or Anita.Payne@rcrtom.com.au who will assist you. In addition, RCR have appointed a Fi Cotter to conduct community engagement activities during the construction period. Fi can be contacted on 0408 587 095 or via email to fi.cotter@rcrtom.com.au.

Local industry breakfast. Nick Farrington speaks to locals at the Burdekin Industry breakfast.
