

Clements Gap BESS
Project Update - December 2025

First Energisation Achieved

Pacific Blue is proud to share that the Clements Gap Battery Energy Storage System achieved **first energisation on 9 December 2025.** This milestone marks the completion of major construction activities on site and the transition of the project into its commissioning phase.

Over the past year, the project has progressed from early civil works through to the installation of all battery modules, inverters, transformers, the new control room, and grid connection infrastructure. Seeing the system energised is a significant step forward and a testament to the hard work of our construction partners, engineers, and the local workforce.

First energisation confirms that the battery has been successfully connected to the grid and is able to safely receive and store electricity. It is a major technical achievement and an important step toward full operational readiness.

Commissioning will now take place in stages, with careful testing of safety systems and charging and discharging functions. This process ensures the battery performs reliably and can respond effectively to changes in South Australia's electricity grid, particularly during periods of high summer demand.

Throughout 2025, Pacific Blue has remained focused on safety, quality, and minimising impacts to the local community. We thank residents for their patience and cooperation as the project moved through its final construction stages.

The Clements Gap BESS will play an important role in supporting grid stability and enabling more renewable energy to operate when it is needed most.

We look forward to celebrating the completion of the project with the local community and project partners at a launch event in early 2026.

From the Clements Gap BESS Project Team, have a safe, Merry Christmas and a Happy New Year!

Crystal Brook Classic Athletics Carnival

Pacific Blue was proud to once again support the Crystal Brook Classic Athletics Carnival, marking our fourth consecutive year sponsoring this much loved community event through the Clements Gap Sustainable Community Fund.

Hosted by the South Australian Athletic League at the Crystal Brook Football Club, the Classic attracted more than 150 competitors from across the Mid North and beyond, including a record number of young athletes taking part. The event continues to be a highlight on the local sporting calendar, bringing together competitors, spectators, and volunteers in a great celebration of athletics.

We are pleased to support opportunities that bring high level competition to regional communities while celebrating local talent and community spirit, and we look forward to supporting the Crystal Brook Classic again in 2026.
